Summary

Frontend Developer with 4 years of experience building scalable, responsive web and mobile applications using JavaScript, React, and React Native. Proven ability in leading frontend development from requirement analysis through delivery, developing real-time collaborative features with WebSockets Socket.IO), and building reusable, high-performance UI components. Experienced in working closely with cross-functional teams, driving code quality through reviews and best practices

Education

B.TECH in Computer Science Engineering

APJ Abdul Kalam Technological University | 2018-2022

Skills

- **Languages:** HTML, CSS, JavaScript, TypeScript
- **Frameworks and Libraries:** React, React Native, Next.js, React Testing Library, Formik, Redux, Redux Toolkit, Tailwind CSS, Webpack, AG Grid, react-i18next, Zustand, TanStack Query
- **APIs and Integrations:** REST APIs, WebSocket (Socket.IO), RTK Query, Axios
- **Tools and Platforms:** Git, Docker, Google Cloud Platform, SonarQube, Cursor, Copilot
- **Additional Technologies:** Node.js, NestJS, Express.js, PostgreSQL, MongoDB
- **Development Practices:** Component-Based Architecture, Responsive Design, State Management, API Integration, Performance Optimization, Debugging & Bug Fixing, Agile Development
- **Personal Project:** Microfrontend architecture using Webpack Module Federation

Professional Experience

Senior Engineer, Qburst – Kochi, India

Jul 2022 – Ongoing

- Led end to end frontend development across multiple projects - from requirement analysis to delivery - supervising cross-team knowledge transfer and code reviews
- Designed and implemented real-time features using WebSocket (Socket.IO), including multi-user data synchronization with Role-Based Access Control and live collaborative voting workflows
- Built reusable, high-performance React components and managed complex state (Redux) across multi-tab interfaces and multi-component data flows, improving maintainability and scalability
- Improved application performance significantly - boosted Lighthouse score from 46 to 79, reduced initial load time by 50%+ through lazy loading, and cut unnecessary re-renders of core components via strategic memoization
- Integrated and customized AG Grid with React for large-scale data handling, real-time updates, and client-specific theme matching
- Converted complex UI designs into fully responsive React components - including a honeycomb-layout interface - and revamped filters, recommendations, and other modules for seamless experience from mobile to laptop screens
- Developed a dynamic cascading filter system that intelligently narrows valid filter options based on prior selections and product availability, improving the search and discovery experience
- Integrated SonarQube and ESLint into the development pipeline and enforced semantic HTML5 standards, strengthening code quality across projects
- Managed and delivered 30+ change requests aligned with stakeholder timelines, and resolved 400+ QA-reported defects across multiple release cycles - ensuring on-time, quality delivery
- Partnered with backend teams to define workflows, supported QA with test case execution, and led client demos for milestone deliveries

Certificates

• **Google Associate Cloud Engineer**

Certification ID: 7fd610f185e8471982eb57eb76891a3f | Google
